CASE STUDY Nº 7

PAPER B

**EPIMORFOTIKA KENTRA LFKOSIAS
NICOSIA
CYPRUS**

WHY NOT TRY? / IT WOULD BE A GOOD IDEA TO...

Trying to mix different group ages in the same class is not easy for the teacher.

First the teacher must be always smiling, open minded and good enough to handle all the different structured questions at the same time.

It will be a good idea to organize the class into groups. Each group must have at least a common interest like age, computer oriented....

When one group is doing a lesson like math the other group by deal with a playful activities. This will make them more independent and the teacher can handle better the class.

It must be also organize playful activities in some common lessons like Business, health, Geography. The Geography can be done through playful activities, using computer games, instead of a typical reading a book of geography.

The lessons must be done in a different way. They can find a different space than a classroom, and this can be done using the Technology. Some lessons can be done outside class or through playful activities. The most important is to create a climate of respect among the students and the teacher.

NECESSARY CONDITIONS: MATERIAL / PLACE / TIME

The Class and also a computer technology. Wi fi even outside class.

Thus will make their lesson more interesting and may these new ways of leaning spaces be more efficient.

POSSIBLE OBSTACLES

Lack of preparation from the part of a teacher. Also lack of cooperation between the students with diferent ages.
