f. Searching for getting a knowledge. g. Comparing the cultures. D. For education  
C. Watching films with the original language, h. Being Immigrant at any country

I think our problem here is deal with immigrant's necessity. Because people leave their home and country to have better life in another country, so, learning language where they live is necessity. Moreover this is a must but it is not very easy for adults and this will take time for these people. What could be done for them to learn that countries' language in a short time?
